

Bring ORDER to your Pharmacy

McCracken's Pharmacy of Waynesburg, PA did. Jeff McCracken transformed his dispensing process and brought order to his pharmacy using the PharmASSIST Enterprise System – Innovation's total automated dispensing and workflow solution.

The Results:

Dramatically improved dispensing quality and efficiency, and a happier, less stressed staff that now has time to proactively provide patient care.

“The PharmASSIST system gives you complete confidence in what you're doing. It does a great job of helping to organize the process, especially during high volume periods, and its accuracy and safety features are top notch.”

True Efficiency

“PharmASSIST's simultaneous counting makes a huge difference, especially in the mornings when you first come in and the system literally counts 15 to 20 different prescriptions at the same time.”

Workflow Management

“Our workflow is the key. Each person has a task assigned to them and they focus on that task only. That by far increases efficiency and it makes the person a lot more responsible and accountable.”

Dynamic Imagery

“Rx Imaging was absolutely key. I wanted the ability to verify the actual hard copy prescription every time we filled a prescription.”
